Work Experience

Contract Backend Web Developer
TrantonLLC 1/2020-2/2020

Worked as a contract backend web developer. I worked with express, mongo, and typescript to create company workflows with different APIs. I also helped manage, and develop applications for Amazon EC2 instances.

Projects

Portfolio
https://github.com/Evan-Nishi/personal-site-v2

Designed, built and deployed my personal portfolio and assets from scratch using nextjs and typescript.

`Nextjs` `React` `Netlify` `CSS` `Typescript`

Ghym
https://github.com/neelr/ghym

Helped my partner plan out and make Ghym, a p2p cloud network for shared computing. Was made at Hack Merced and won best moonshot and best use of mongodb prizes. I made some routes in express and helped maintain code quality.

`Socketio` `Expressjs` `Mongoose` `Javascript`

Clichatroom |Work in progress|
https://github.com/Evan-Nishi/clichatroom-server

Currently building a terminal based chatroom using socketio rooms, express, and mongo atlas.

`Socketio` `Expressjs` `Mongoose` `Typescript`

Education

Diablo Valley College
2019-2022

Associates degree, computer science
